***Unlimited possibilities,  
for the facade***

Baunit CreativTop

# Creative Textures

- **Unlimited design possibilities**
- **Wide range of individual textures**
- **Unique surfaces guaranteed**

The individual appearance of a façade does not only depend on its colour but also on its texture. Baunit CreativTop has been created to provide unlimited possibilities when it comes to texture. Formulated as a ready-to-use, silicone-based render it gives total design freedom. The different textures it can create, lend a mix of shade and light to the

same rendered surface and thereby give the façade a depth that subtly changes from day to night and from season to season.

### Effective creativity

Because this versatile and easily applied render is available in nearly every colour from the Baunit Life colour range, there are endless creative combinations.

Whether floated, dragged, combed or stippled, coarse or smooth – these and numerous other façade textures can now become a reality with Baunit CreativTop.

So now you can not only choose the right colour but also the right texture for your walls.

### Improved recipe

The new recipe makes Baunit CreativTop easier to use and similar to StarTop it also guarantees a quick dry surface after fog or rain. Therefore, the risk of algae and mould infestation is reduced significantly.

Baunit CreativTop is also available in **12 unique white tones**, including Baunit Star White, the whitest of the new Baunit “**Shades of White**” - Colour line.

CreativTop is a versatile product that comes in 6 variations of grain size. Here are some examples of the effects that can be created with these different variations using different application techniques:

# Smooth Façades

- **Perfectly smooth surface**
- **Pure and modern**
- **Two degrees of fineness**

Despite all the textures and colours available, there is always a need for smooth façades. Smooth façades are currently experiencing a comeback in international architecture. In southern and eastern Europe, smooth façades have always been the standard style. That is because these areas mostly work with renders, whereas masonry was the preferred material in the north and west. Architectural styles have always progressed from indoor to outdoor design and today all the possibilities for a craftsman-like interior design can now be applied to the façade.

In order to create a smooth finish to the façade Baumit offers 3 variants of CreativTop; Vario, Pearl and Silk.

### Smooth façades on EWI

You can also apply a smooth render finish to an EWI system. To achieve a perfectly smooth surface, start with a clean basecoat with the bonding of the EWI boards. The adhesive mortar, StarContact White, is ideal for this and CreativeTop Vario provides the perfect finish.

## BAUMIT CREATIVTOP VARIO, PEARL & SILK

**Baumit CreativTop Pearl with Baunit Metallic Titan**

**Baumit CreativTop Silk with Baunit Metallic Gold**

### Build-up at a glance:

- Baumit StarContact/StarContact White
- Baumit insulation board
- Baumit StarContact/StarContact White (3mm) with Baunit StarTex
- PremiumPrimer
- Baumit CreativTop Vario
- Baumit CreativTop Pearl or CreativTop Silk = smooth surface

### Two techniques for a smooth finish

Choose between two different approaches:

#### Option 1 with CreativTop Pearl

- Baumit CreativTop Pearl is the fastest option. A thin coat is applied to the basecoat. It produces a fine façade surface which features a pearl texture, and is available in 758 colours.

#### Option 2 with CreativTop Silk

- Baumit CreativTop Silk: This option requires a little bit more technical skill. After applying Vario as the basecoat, you need to add two layers of CreativTop Silk. The surface can be improved further by sanding. The result will be a wonderfully smooth façade.

For creative colour designs, we recommend a coat of Baumit StarColor – available in 758 Life colours – or Baumit Metallic, Glitter or Lasur.

#### Correct application

Before starting work, the substrate has to be prepared. A base layer must be applied first dependent on the method chosen above. Once it is completely dry, one coat of the selected topcoat layer is applied using Baumit CreativTop Pearl or Baumit CreativTop Silk.
